

## INSTALLATION GUIDANCE FOR METAL FENCES

DefendaStrip® Rise and Spin are suitable for installation on metal fences. The Rise requires metal banding to fix to either one or both sides. The Spin can be installed on 358, 656, 686 and 868 metal mesh fences using our specialist bracket.

***ENSURE ALL INSTALLATION SURFACES ARE FREE OF DEBRIS PRIOR TO FITTING.  
PROTECTIVE GLOVES ARE RECOMMENDED WHEN INSTALLING.***

### Recommended fixing method for DefendaStrip® Rise

For fitting the Rise on the face of a metal fence, a 358 security fence for example, banding is the only suitable method. Using our Ball-Lok ties, sections of Rise are easy to install on one side or both sides of the fence and tightened with our specialist tool. If fitting on both sides and extra security is required it is advised to insert a 4.2 x 60mm screw (security head recommended) which will further secure both sections of Rise together.

<b>FIXING</b>	Coated stainless steel cable ties
<b>TYPE</b>	BAND-IT Ball-Lok Ties
<b>WIDTH</b>	7.9mm
<b>LENGTH</b>	25mm min
<b>METHOD</b>	Place Ball-Lok tie between second and third cone from each end of the Rise to secure Rise section. Pull to hand tighten and finish with Ball-Lok tool (do not overtighten). Continue run as required.

### Recommended fixing methods for DefendaStrip® Spin

Our custom made brackets are used to secure Spin fence sections on 358, 656, 686 and 868 metal mesh fences. The Spin metal fence option comes complete with brackets attached and ready to install.

<b>FIXING</b>	Mesh fence clips, screw/bolt and nut
<b>TYPE</b>	Clip suitable for fence type, M8 security screw/bolt and M8 Nylock nut or shear bolt
<b>WIDTH</b>	7.9mm
<b>LENGTH</b>	25mm min
<b>METHOD</b>	Place Spin section on fence where required using lugs to locate. Fix to fence with mesh fence clips and fasten with screw/bolt and Nylock nut or shear bolt. Continue run as required.
